

CB - Bug #2703

TLsv3 emails failing if fsocks doesn't support tls auto-switching

06 August 2011 12:38 PM - beat

Status:	Closed	Start date:	06 August 2011
Priority:	Normal	Due date:	
Assignee:	beat	% Done:	100%
Category:		Estimated time:	1:30 hour
Target version:	CB 1.7.1		
Description			
Issue is documented here:: http://www.devnetwork.net/viewtopic.php?f=52&t=96525			
Solution: upgrade CB's mail library to PHP5 phpmailer 5.2.0: http://code.google.com/a/apache-extras.org/p/phpmailer/			

History

#1 - 06 August 2011 12:48 PM - beat

- File *phpmailer.zip* added
- Status changed from *Assigned* to *Closed*
- % Done changed from *0* to *100*

r1561 and r1562 implement that fix.

Attached zip file is the new replacement library in case someone needs to patch an old CB 1.4 or current 1.7 release.
