

CB - Bug #2729

Userdata substitutions no longer accept parameters reason and default

22 August 2011 09:44 PM - krileon

Status:	Closed	Start date:	22 August 2011
Priority:	Urgent	Due date:	
Assignee:	beat	% Done:	100%
Category:		Estimated time:	2:00 hours
Target version:	CB 1.7.1		

Description

When using a userdata substitution it no longer accepts parameters like reason, etc.. Examples as follow.

[avatar]

[cb:userdata field="avatar" reason="profile" /]

[cb:userdata field="avatar" reason="list" /]

They all output exactly the same. Not all parameters should be supported as the output attempted should always be PHP, but "reason" should still be useable to allow for example getting the thumbnail URL vs getting the fullsize URL of avatar. Subsequently [avatar] through API returns a full URL instead of just the filename now.
