Description

A number of users have been complaining that CB 1.7 breaks their emailing.

We investigated such a case and found that the emails were in fact sent but some email environments would reject (?) such emails because the receiving address was invalid.

Suggest a stronger message in the help area.

Implemented in r1594 :

```
DEFINE ('_UE_REG_EMAIL_FROM_DESC','Email address you want to be used when emailing registrants. Keep empty to use CMS From email address. But make sure to use a valid email to avoid email delivery issues.');
```
