#### Description

As described here:

<https://www.joomlapolis.com/forum/147-potential-bug/180869-mass-mail-problem#180869>

I was able to reproduce on Joomla 1.7.2 with CB 1.7.1 having 4 test users and a single select drop down field which takes values 1,2,3,4.

All 4 test users are given the field value of 4 here.

If I use Advanced filter in CB User manager and filter using 'is' 1 and then send mass mail test, then all 4 users will receive emails just fine.

If I use Advanced filter in CB User manager and filter using "is any one of '1,2' selected then filter seems ok as it produces all 4 test users but mass email does not send to any of them.

#### History

##### #1 - 02 November 2011 11:57 PM - beat

- File 2950.patch added
- Status changed from New to Closed
- Assignee set to beat
- Target version set to CB 1.7.1
- % Done changed from 0 to 100
- Estimated time set to 2:00 h

that was a wierd one: search "any of" single-select are converted by jquery into multi-fields, but that happened after ajax was sending mass-mail form + click on hidden fields didn't work correctly. Now fixed order and method.

Fixed in CB 1.7.1,  
Patch attached.
